Education

Feroze Gandhi Institute of Engineering and Technology

B.Tech, Computer Science

• GPA: 8.6

Nov 2020 - Jul 2024

Raebareli, India

Experience

Evolution Software Solution

Jul 2024 - Present

Software Engineer - Automation Test Engineer / Backend Developer

Noida, Sector 62

- Cainz Project: Developed and maintained Selenium WebDriver automation frameworks using Java and TestNG, automating 150+ regression and functional test scenarios. Created reusable and maintainable test scripts while supporting Smoke Testing, Regression Testing, Agile Scrum processes, and Defect Lifecycle management.
- PetX Project: Executed Functional Testing, Smoke Testing, and Regression Testing for an AI-driven mobile application across Android and iOS platforms. Automated critical user journeys using Appium and validated application behavior through manual and automated testing.
- WarpX Project: Developed API Automation and UI automation frameworks using Python and Pytest. Integrated Mistral API workflows, validated APIs using Postman, connected automation pipelines through GitHub Actions and Docker, contributed to Node.js backend development, and performed SQL-based data validation.

Projects

Cainz

- Java, Selenium, TestNG - Automated test scenarios for enterprise-level web applications.

PetX

- Appium, Android/iOS, Manual Testing - Verified AI pet care logic across platforms.

WarpX

- Python, Pytest, Node.js, Mistral API - Built an AI doctor simulation with CI/CD using GitHub Actions and Docker.

Journal App

- MERN Stack - Developed a full-stack journal application using MongoDB, Express.js, React, and Node.js with user authentication and CRUD functionality.

Journal Backend API

- Spring Boot - Built RESTful API service with JWT-based authentication, integrated with a MongoDB database and deployed via Docker.

Technical Skills

- **Languages:** Java, Python, JavaScript, TypeScript, C/C++, SQL
- **Test Automation Tools:** Selenium, Appium, TestNG, Pytest, REST Assured
- **Backend:** Node.js, Express.js
- **API Tools:** Postman, Mistral API, RESTful APIs, API Automation
- **DevOps:** Docker, GitHub Actions
- **Version Control:** Git
- **Operating Systems:** Windows, Linux
- **Other Tools:** Excel, MS Office, Functional Testing, Regression Testing, Smoke Testing, Agile Scrum, Defect Lifecycle Management, , , , , Oracle Fusion, Oracle EPM (EDMCS, ARCS, FCCS, EPBCS)

Certifications

- Version Control: Version Control by Meta
- C++ Programming: CPA – Programming Essentials in C++ by Cisco Networking Academy
- Cybersecurity Essentials: Cybersecurity Essentials by Cisco Networking Academy
- Introduction to Cybersecurity: Introduction to Cybersecurity by Cisco Networking Academy
